

Where the Conversion Leaks Are

nomadinternet.com · CRO Recommendations · August 2026

The most valuable conversion mechanism on this site is guiding users through the plan selection and qualification process. This mechanism is bleeding value due to severe performance issues, where the "Largest Contentful Paint is 46.4 seconds on mobile," causing users to abandon before engaging, and further hampered by a confusing user journey where "multiple competing primary CTAs" create ambiguity about how to proceed.

#	Finding	Severity	Effort	PXL
1	Slow Mobile LCP The page's main content takes an excessive 46.4 seconds to appear on mobile, causing most visitors to bounce.	Urgent	Medium	5/10
2	Mobile Layout Shifts Significant layout shifts during mobile page load cause mis-taps and a frustrating user experience.	High	Medium	5/10
3	Mobile Main Thread Blocked Excessive script execution freezes the main thread for 2,140 ms on mobile, making the page unresponsive...	High	Medium	5/10
4	Heavy Third-Party Scripts The homepage loads 65 scripts, which is the usual root cause of slow interaction readiness on mobile.	High	Medium	5/10
5	Slow Blog LCP Mobile Measured in a lab load on /blogs/countrynomad/content-delivery-network-cdn: the page's main content takes...	High	Medium	5/10
6	Blog Mobile Layout Shifts Measured in a lab load on /blogs/countrynomad/content-delivery-network-cdn: the layout jumps while loading...	High	Medium	5/10
7	Generic Value Proposition The hero headline promises reliability but does not articulate why Nomad is better than alternatives in terms...	Medium	Low	5/10
8	Inconsistent Pricing Display The same plans show conflicting monthly prices across pages, undermining trust in the stated cost.	High	Medium	4/10

#	Finding	Severity	Effort	PXL
9	Unclear One-Time Fees One-time prices are listed without explanation, leaving the total cost ambiguous.	High	Low	4/10
10	Competing Primary CTAs Each page presents several equally prominent CTAs, creating ambiguity about which action advances the...	Medium	Medium	4/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
